

Minutes of Meeting

Date: 31 March 2026

Time: 5:00pm – 7:00pm

Location: Zoom meeting

Attendees:

Hao Zhiyi

Wu Yanjie

Fang Yu

Agenda Items

- Discuss feedback from professor
- Revise project methods and poster content
- Confirm task allocation

Key Discussion Points

Method Update after discussion with Prof

- The team discussed that the original plan was not strong enough after further review.
- Professor gave suggestions on improving the project and pointed out that our dataset is time series data, so the analysis should better match this characteristic.
- He suggested that we refer to the R package materials in Chapter 17 and for cluster, should use dtw cluster method, the team adjust the methods based on that direction.
- After discussion, the team agreed to revise the project methods accordingly.
- For the poster and Shiny App, the team decided to keep the current four-part structure, but make the explanations more consistent with the revised method direction.

Conclusion: All members agreed to revise the project methods based on professor's advice and the time series nature of the dataset.

Poster and Shiny App

- Wu Yanjie said that the poster should still clearly present the four parts of the project: EDA & CDA, cluster analysis, geospatial analysis, and forecasting.
- Hao Zhiyi mentioned that the revised method should also be reflected in the poster explanation and the Shiny App design.
- Fang Yu agreed and said the Shiny App should follow the same structure as the poster, so that the whole project looks consistent.
- The team agreed that the current poster structure is still suitable, and revisions

should mainly focus on making the logic clearer and matching the updated analysis direction.

Conclusion: All members agreed to keep the current poster and Shiny App structure, with revisions to improve clarity and consistency.

Decisions

- Revise the project methods based on professor's feedback.
- Refer to the R package materials in Chapter 17 because the dataset is time series data.
- Keep the current poster and Shiny App structure:
 - EDA & CDA
 - Cluster Analysis
 - Geospatial Analysis
 - Forecasting

Action Items

Task	Description	Assigned Member	Deadline
Cluster Analysis	Revise and complete cluster analysis part	Hao Zhiyi	1 April 2026
EDA & CDA	Finalise EDA & CDA analysis and visuals	Wu Yanjie	1 April 2026
Geospatial Analysis	Finalise map and forecasting parts	Fang Yu	1 April 2026

Next Meeting

- **Objective:** Review final poster and Shiny App before submission
- **Date & Time:** To be confirmed
